ACS Valves Test Center

ACS Rotary Valve Test Center is designed to test our customer's materials to determine which rotary valve or feeder is best suited for their application. Our diverse test center gives us the ability to test materials in a gravity application or in a dilute phase conveying system. The dilute phase system is capable of testing product using pressure or vacuum powered by a 20 HP blower package. The featured rotary airlock valves in the system are a CI 8" and a DR-S 8". Call ACS for information on testing your product today at 800-655-3447 or visit www.acsvalves.com. We believe our products are designed for customer success!

Quality Done Right the First Time

If you would like any further details on the topics discussed above, please contact our offices by phone at **800-655-3447**, or by e-mail at sales@acsvalves.com. Many thanks for all your support and interest in our Rotary Airlock Feeders.
