

Rebuild/Repair Rotary Airlock Valves

Before

After

Ship us your rotary valves/airlocks in need of repair. We will arrange freight to and from your facility, adding the freight cost to the final invoice. We will assess the airlock and send a quote for repairs.

Repairs

- Disassembly and inspection
- General Cleanup
- Machine housing and endplates
- Replace seals and bearings
- Weld and/or machine rotor to original clearances
- Replace rotor assembly
- Repaint

Extended Life Options

- Chrome coating interior bore and endplates
- Tungsten Carbide coating
- Add adjustable/replaceable mild steel/hardened steel rotor tips to rotor
- NEW AR rotor assembly
- Stellite welded rotor tips

We repair **all rotary valves including Meyer, Flowtronics, MAC, KICE, Smoot, Semco, Prater, K-Tron/ Premier, Rotolok, and of course, OUR OWN!*

How To Ship To Us:

Call or email us, and we will arrange the shipment, send you the required paperwork, and have the valve picked up the next day!
